

Disclaimer for provision of Dataset Information

In this disclaimer, “Dataset Information” means the information derived from IP Australia’s trademarks, patents or designs databases provided to you by IP Australia in response to your request.

No responsibility assumed

Care has been taken by IP Australia in collecting and compiling the Dataset Information. However, IP Australia does not warrant or represent that the Dataset Information is free from errors or omissions, or is complete, accurate or up-to-date, or is suitable for your purposes.

Limitations of the Dataset Information

The databases from which the Dataset Information is derived contain large quantities of information which has been entered manually, and inevitably errors and inaccuracies occur in such a process. Although efforts are made to identify such errors and inaccuracies, the Dataset Information may nevertheless contain errors and inaccuracies.

Much of the information contained in the databases from which the Dataset Information is derived, has been provided by third parties. You should independently verify the accuracy and completeness of the Dataset Information before relying on it.

The databases from which the Dataset Information is derived are regularly modified and updated, and so the Dataset Information provided by IP Australia may be inaccurate after the date it is made available to you.

The databases from which the Dataset Information is derived do not contain recently filed patent, design and trademark applications, and do not refer to inventions, processes, products and trade marks that are not registered.

Because of certain international laws and conventions, patent, design and trade mark applications not yet filed in Australia may be relevant to you when filed at some future time. The rights granted in relation to those applications may be back-dated to a time prior to the provision of the Dataset Information.

The Dataset Information should not be used as a substitute for professional advice and assistance, and we strongly recommend that such advice and assistance be obtained before you take any commercial decisions or steps.

The intellectual property laws of other countries are different to those of Australia. You should consult an appropriate professional if foreign laws affect you.

Except to the extent required by law, IP Australia is not liable for any loss or damage however caused (whether by negligence or otherwise) which may be suffered or incurred or which may arise directly or indirectly in respect of the provision of the Dataset Information, including loss or damage suffered as a result of any error, omission or misrepresentation in the Dataset Information.

Commonwealth copyright

The Dataset Information provided to you may be the subject of Commonwealth copyright. Amongst other uses, copyright entitles the owner to the exclusive right to reproduce and adapt the materials. Reproducing and adapting the Dataset Information may infringe the copyright. You are permitted only to reproduce or adapt the Dataset Information for personal, non-commercial use, research, study, or for the giving of professional advice by a legal practitioner, patent attorney or trade marks attorney, as permitted under the fair dealing provisions of the *Copyright Act 1968*. Requests for authorisation to use the Dataset Information for any other purpose should be directed to Kay Collins, Director of Strategy & Projects, IP Australia (email kay.collins@ipaustralia.gov.au or phone (02) 6283 2157).
