

## New plants from old

### Worksheet 9 - Design your own new plant

It's time to create your own plant

You have to look at some other plants, and decide what bits of them you want in your own plant. For example, you might want to create a new plant that has the shape of a rose, the leaves of a camellia, the scent of lavender and the colour pattern of a pansy.

You have to 'create that plant, and then fill in the form to claim the rights to it.

You can also give it a name, and a description to put with it that might interest people in buying it.

Good luck with your creation!

Now fill in this form and register your own new plant as yours.
